ABOUT US

At SAS Security Products we understand how much your valuable assets mean to you – whether it's the freedom of your caravan, the convenience of your trailer, the security of your property, or the safety of your vehicles, these aren't just things; they are investments in your lifestyle, your hobbies, your livelihood.

But here's the tough truth: in the evolving landscape of today's world, the threats of crime and theft persist and continue to rise. While some crime figures show progress, specialist reports highlight ongoing challenges. Did you know that 'trailer theft made a worrying resurgence, up 15% to £1.3m*' in 2024, and rural crime remains 'increasingly organised, serious and persistent in nature*.' This constant threat underscores the critical need for robust security measures.

Our mission at SAS is simple: to help put a stop to theft by providing reliable security solutions designed to keep all your valuable assets safe and secure. We are here to help you protect your investments and give you that priceless feeling of security.

For over 38 years, we have been dedicated to designing and manufacturing some of the most trusted security products on the market. From our renowned wheel clamps and hitch locks for caravans and trailers, to robust solutions for property, vehicles, and everyday universal security needs, quality, reliability, and your peace of mind are always at the heart of everything we do.

We've spent decades listening to our customers, understanding their needs, and constantly evolving our products to stay one step ahead of criminals. That's why so many owners, insurers, and industry experts trust us to secure their world.

Secure your world with SAS Security Products and experience the confidence that comes with knowing your assets are protected.

* NFU Mutual's 2025 Rural Crime Report

"This firm has to be. Or should be the best in the UK. The staff went above and beyond to help me with my needs."

M. Smith

"Thank you for helping me purchase the correct hitch locks for our trailers. Having both locks on the same keys is going to make things so much easier!"

A Powerful Partnership: PJB Security Products Joins SAS

We're thrilled to announce that PJB Security Products has officially joined the SAS Security Products family. This exciting acquisition brings together two respected names in high-quality security solutions, creating an even more comprehensive range of security products.

PJB Security Products boasts a proud heritage of over thirty years, specialising in robust security for motorcycles, scooters, ATVs, Quads, bicycles, and essential garage, shed and outdoor areas. Their expertise in ground anchors, chains, and locking devices, combined with their British manufacturing excellence, perfectly complements SAS's extensive portfolio. This strategic addition means more choice for our loyal SAS customers and the same high-quality, reliable products for existing PJB customers, all under the trusted SAS brand.

TESTED. TRUSTED. SECURED.

When it comes to protecting what matters most, you need security you can depend on. That's why uncompromising quality is at the heart of every product we design, ensuring that from the product body to the high-security locks, every part is engineered for superior protection. Our commitment to quality is proven by the rigorous, independent testing that many of our products undergo, allowing our solutions to stand up to everything from opportunist thieves to organized crime, giving you the ultimate peace of mind.

Security made simple

We understand that security shouldn't be a hassle. We believe in providing solutions that make your life simpler. From our quick-fitting products that are designed for fast and easy installation to our keyed alike options that allow a single key to operate multiple locks, our focus is on providing reliable security that works around you.

The Keyed-Alike advantage

For ultimate convenience, our keyed alike option allows one key to operate multiple locks. For example, if you have two or more SAS products with the same type of lock, the same key could be used to operate all the locks. This simplifies your security routine and eliminates the need to carry a large, jangling set of keys. Ask us about the keyed alike option on our qualifying products.

Sold Secure

What is Sold Secure?

Sold Secure is an independent, third-party organization that rigorously tests and certifies security products in the UK. Established by police and owned by the Master Locksmiths Association, they are the industry's benchmark for security testing. They provide reliable, unbiased information on how well a security product performs against real-world attack methods.

Why Sold Secure Matters to You

When a product carries the Sold Secure approval, it means it has been independently tested to withstand determined attacks from thieves. This isn't just a claim, it's proven performance that gives you confidence in the product. Many insurers recognise or require Sold Secure products, potentially aiding your policy or claims.

Understanding Sold Secure Ratings

Sold Secure uses a clear tiered rating system to indicate a product's level of resistance:

- **Bronze:** Good resistance against opportunist thieves.
- **Silver:** Greater resistance against more determined thieves.
- **Gold:** High resistance against dedicated thieves.
- **Diamond:** The highest security grade, designed to deter the most destructive and professional attacks.

(The higher the rating, the tougher the test a product has passed.)

Look for the Sold Secure quality mark on our approved products.

Secured by Design

SAS proudly offers solutions accredited by **Secured by Design (SBD)**. We are an Accredited Member Company of this official police security initiative, meaning products are rigorously tested to the Police Preferred Specification. When you choose an SBD-approved product, you're investing in security that is recognised and trusted by the police to deter and reduce crime. Look for the SBD quality mark on our approved products.

Insurance Approved

Many insurers recognise the robust security our products provide. While our products meet industry criteria for approval, we always recommend confirming details with your specific insurance provider. Look for the insurance approval symbol on our approved products.

SAS Commitment to Quality

Many of our products now use the Detained Disc Lock. They are an advanced evolution of disc tumbler lock technology. They use rotating brass discs instead of fragile internal springs, providing enhanced anti-pick protection and zero spring fatigue. The zinc alloy body offers superior corrosion resistance and durability, while the solid brass components are built to withstand moisture and extreme conditions.

TRAILER SECURITY

The threat of theft is a major concern for every property owner. While a single security device can deter the opportunist thief, combating a more organised, professional gang that uses specialised tools and techniques requires a comprehensive security approach.

We offer a complete range of security solutions designed to protect your assets from multiple angles, ensuring maximum deterrence and providing ultimate peace of mind. This multi-layered approach is not just a theory; it's a proven strategy.

Many of our security products are rigorously tested and independently verified with accreditations like **Sold Secure** and **Secured by Design** to guarantee their effectiveness. By implementing a system that includes these highly-rated products, you not only make your property a difficult target but may also be rewarded with policy discounts from many insurance companies.

Ultimately, a multi-layered security system is your best defence, forcing thieves to abandon their efforts and seek an easier target.

HITCHLOCK SELECTOR GUIDE

Why fit a hitchlock to my trailer or caravan?

SAS hitchlocks are an essential item for anyone with a trailer or caravan, as they are so easy to steal if they are not locked – just hitch up and go! The SAS hitchlock range comprises of various easy to fit options to give you that peace of mind that someone else can't easily hook up to their vehicle and drive off.

Many hitchlocks in the SAS range offer you the option to lock your caravan or trailer to the towing vehicle when parked in the motorway services. Or, if you are a landscape gardener or tree surgeon, you may wish to lock your trailer or woodchipper to your truck whilst working in the back garden.

Does your trailer have a ball hitch or an eye hitch?

Ball Style Hitch

50mm ball hitch is the most common for trailers and on virtually all caravans

Eye Hitch

If YES
Go to pages
36-37

Does your trailer/caravan have brakes?

Braked trailers will generally have a rubber bellow directly behind the hitch, then a braking damper device mounted on the drawbar frame.

If YES
Go to page
29

No

Is your trailer an unbraked version?

Where the hitch is mounted directly to a fixed drawbar on the trailer.

If YES

Unsure?

Technical Support

Our technical team will be pleased to assist you to choose the correct hitchlock. Simply send pictures of your hitch coupling for a free assessment and recommendation, either by

email to sales@sasproducts.com or WhatsApp to +44 1444 675889

HITCHLOCK SELECTOR GUIDE

HITCHLOCKS FOR UNBRAKED TRAILERS

Where the hitch is mounted directly to a fixed drawbar on the trailer.

In addition to multiple different hitch heads being used on trailers, manufacturers also use a vast range of different drawbars and fixing methods on unbraked trailers. SAS are always seeking to develop and adapt hitchlocks to cater for as many as possible. Below is a guide to help identify the right hitchlock for your trailer.

Pressed Steel Hitch

There are many different versions, from various manufacturers, but they are typically have the folded rim around the bottom, being pressed from a sheet of steel. The metal is normally zinc plated and a relatively smooth finish.

Bradley Cast Hitch

Cast hitch heads are thicker material and a slightly rough surface to touch.

Indespension Triple Lock

Bradley Double Lock (D Handle)

Knott Cast Hitch

Y-Shaped Coupling on A-Frame Drawbar

Drawbar must have an angled rear shape coupling as shown in picture above.

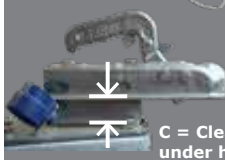

Straight Drawbar

A-Frame to Straight Drawbar

FORT U HITCHLOCK

2180761

FORT TU HITCHLOCK

2190761

Most unbraked trailers are fitted with a breakaway safety cable. Sometimes these cables are fitted to small metal brackets and these brackets can obstruct the fitting of the hitchlocks. In this situation, seek advice from your trailer specialist as they will likely be able to adapt these slightly to allow fitting.

These tables are intended as a guide only for selecting a suitable hitchlock, but due to there being so many variants on trailer hitches and drawbars, SAS cannot be held responsible should it not fit your hitch.

HITCHLOCKS

FORT RANGE

The FORT hitchlock series covers a wide range of trailer couplings on the market.

- › Can be fitted whilst caravan/trailer is hitched or unhitched from towing vehicle
- › Prevents vehicle and caravan/trailer being separated in a car park or motorway service station
- › Quick and easy to fit, strong twin wall steel structure fully encloses hitch and bolts to provide maximum protection against attack
- › Maximum security safe-style enclosed lock, with twin locking pins and anti-drill protection
- › Secure cruciform style keys
- › Excellent visual and physical deterrent
- › Compact and easily stored – ideal for touring

Use our hitchlock selector guide to select the correct lock for your hitch - see pages 27-29

- › Fully encloses hitch handle and bolts
- › High security steel encased lock
- › Quick and easy to fit
- › Excellent visual and physical deterrent

THE ORIGINAL SAS HITCHLOCKS

The Original hitchlock range is designed to fit a range of pressed steel hitches on both braked and unbraked trailers.

HL2 HITCHLOCK

HL3 HITCHLOCK

The HL2 is a robust hitchlock designed primarily for unbraked trailers with a drawbar up to 60mm wide. Its design accommodates virtually any drawbar depth, making it a highly versatile security solution. It will also fit many trailers that have a rest stand fitted underneath the hitch, securing it in place using the hitch's existing bolts.

The HL3 hitchlock is engineered specifically for unbraked trailers with A-Frame drawbars that are fitted with a Y-shaped coupling hitch. Its dedicated design ensures a secure and precise fit, providing reliable protection for this common type of trailer.

Use our hitchlock selector guide, on pages 27-29 to choose the correct lock for your hitch

- › Can be fitted whilst caravan/trailer is hitched or unhitched from towing vehicle
- › Prevents vehicle and caravan/trailer being separated in a car park or motorway service station, when stationary
- › Quick and easy to fit, strong steel structure fully encloses hitch and bolts
- › Fitted with high security anti-drill radial pin tumbler lock
- › Excellent visual and physical deterrent
- › Compact and easily stored – ideal for touring

 **Voted best buy for its security and value.**

SECURITY STEEL BRAIDED CABLES

Strong flexible braided security cables are great for locking up equipment. Just thread through and use a padlock through the loop ends to secure. If you need longer you can simply join cables either using a padlock or by a lasso method.

LOOP CABLE

- › 12mm high-tensile steel braided cable
- › Vinyl coated to protect your paintwork
- › 2 lengths available 2500 & 6000mm

Lasso one end of the steel braided cable around a post, trailer frame or ground anchor to effectively double the useful length.

LOOP CABLE & LOCK

- › Includes a HD43 heavy-duty mini shackle padlock, with 3 keys
- › 2500 mm x 12mm high-tensile steel braided cable
- › Vinyl coated to protect your paintwork

For more information on HD43 padlock, including dimensions - see page 61

Lasso method of joining cables

COMBI LOCK

- › A cost effective, lightweight and easy to use security cable.
- › 1800x12mm high-tensile steel self-coiling cable
- › Vinyl coated to protect paintwork
- › Re-settable 4-digit combination
- › No keys to lose!

› Built-in LED light enables easy use in the dark

HEAVY-DUTY SQUARE-SHACKLE SECURITY CHAIN

8132065

8162043

8161543

The square-shackle chain is a secure mid-range chain which is light enough to be easily carried, but still extremely secure to deter would-be thieves. The chain is ideal for securing your trailer, caravan, motorbike, or machinery to a ground anchor, when stored overnight, short-term, or long term.

The hardened steel square-shackle design gives the chain ample room to be locked with a heavy-duty padlock. We recommend using this square-shackle chain with a SAS ground anchor to increase the security by locking down your equipment.

- › 14 and 10mm square-shackle chain links made from high grade steel
- › Case hardened chain resists bolt croppers
- › HD43 Tough durable double-locking padlock with hardened 12.7mm steel shackle
- › Supplied complete with 3 keys
- › Zinc-plated chain to prevent corrosion
- › Non scratch heavy-duty woven cloth-covered chain sleeve

PADLOCKS

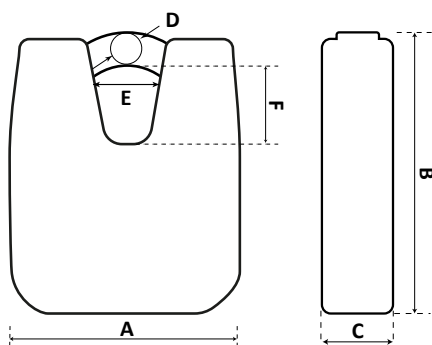

Our selection of heavy-duty padlocks includes our reliable SAS padlocks alongside the best padlocks on the market for applications where an SAS padlock is not suitable for your application. These versatile locks are designed to work on their own or with other SAS products to secure a wide range of your equipment and assets.

MONSTER CLOSED SHACKLE

8301665

- › Heavy Duty Monster Padlock supplied with 3 keys
- › Sold Secure Gold rated padlock for maximum security
- › Hardened boron steel armour casing
- › Double locking mechanism and sliding key dust cover

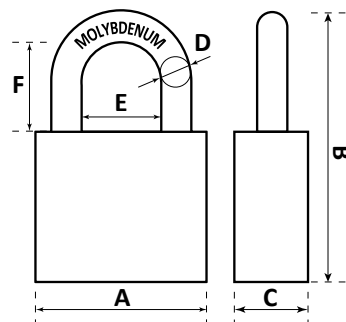

FEDERAL FD730 SS

8351055

- › Sold Secure Silver approved for trusted security
- › CEN 4 security rating for high-grade protection
- › Hardened solid steel body for long-lasting durability
- › Molybdenum 11mm steel shackle for cut resistance
- › Double ball bearing stainless steel locking system
- › Anti-drill, bumping, and picking resistant cover plate
- › Keys removable only when locked

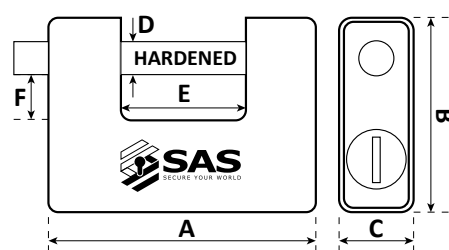

C-TYPE SOLID STEEL

8300075

- › Includes five advanced security keys
- › 12mm diameter shackle
- › 41mm shackle opening for flexible use
- › Solid steel body for toughness
- › Rotating shackle pin blocks saw cutting
- › Brass locking cylinder resists rust

For Van Hasps
- see page 41

For ground anchors
- see pages 64-69

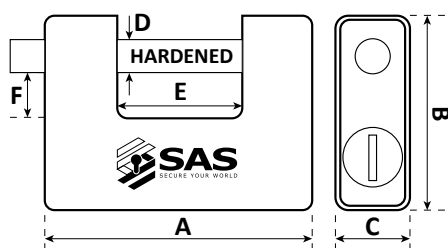

PADLOCKS

HD85-75 SOLID HARDENED STEEL

8375085

- › Features 75mm hardened stainless steel for extra strength
- › Secures containers, shutter doors, and other items
- › Works well with security chains or cables
- › Compatible with PJB garage defender systems
- › Includes five keys for easy key management

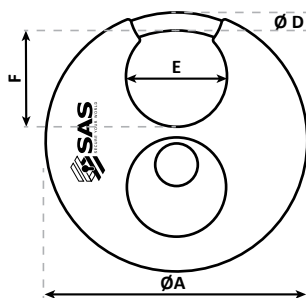

DC70 DISC PADLOCK

8300033

- › Heavy-duty stainless steel disc padlock.
- › Made from stainless steel
- › 9.5mm steel shackle

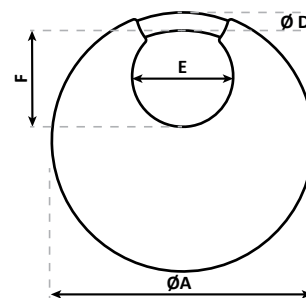

MASTER LOCK EXCELL M50

8301837

- › Rust-free stainless steel casing for lasting durability
- › 12mm Boron-Carbide octagonal shackle, 50% stronger than hardened steel
- › Accepts two 10mm links or one link up to 16mm
- › Anti-drill plate prevents tampering and force attacks
- › Key-retaining system keeps lock closed unless key is inserted
- › Four keys included for easy sharing and spares

UNIVERSAL SECURITY

KB21 UNILOCK

The KB21 Unilock Rectangular Padlock is a versatile security solution for tight spaces. Its unique design features a large opening with a slim shackle, making it perfect for securing Knott trailer hitches, Blue Line box trailer rear shutter doors, and Ifor Williams trailer rear doors or ramps. Constructed with a solid brass body and a hardened steel shackle, this padlock delivers reliable strength and long-lasting durability.

- › Solid brass lock body, giving great durability
- › Enclosed hardened chrome plated steel shackle, for increased strength
- › High precision 6 pin brass lock and cylinder core, for a smooth operation
- › Supplied with 3 nickel plated brass keys
- › Also available keyed alike

Blue Line box trailer rear shutter door or ramp catches

KB21 UNILOCK is also designed to fit a Knott pressed steel trailer hitch, with a curved handle and hole right through - see page 34

KB21 UNILOCK

50MM PADLOCK

8304021

SET OF 4 PADLOCKS AVAILABLE FOR IFOR WILLIAMS BOX TRAILER REAR DOOR/RAMP

UNIVERSAL BRASS PADLOCK

A great range of general-purpose padlocks with a solid brass body, making them very versatile for use in a wide range of environments and applications.

The shackle is heat-treated hardened steel, with a secure double locking mechanism. The padlock also has a high precision lock mechanism with a brass cylinder core and 5 brass key-way pins, this is coupled with stainless steel springs giving the padlock higher security, good durability, and resistance, with a smooth operation.

UB40 PADLOCK

- 40mm Brass Padlock
- Tough hardened steel shackle

DOCKING STATIONS AND GROUND ANCHORS

HEAVY-DUTY DOCKING STATION

8611000

This heavy-duty docking station provides unbeatable security with its rigid, forged steel construction and Thatcham Approval.

- › Sliding pin lock fits chains up to 16mm
- › Semi-elliptical high-security key resists picking
- › Plastic cover prevents dust and water ingress
- › Includes 4 x high-security fixing bolts
- › Suitable for floor or wall mounting

HOOK WALL ANCHOR

8602000

This hook wall anchor provides strong and reliable chain security. Its durable, weather-resistant finish ensures lasting protection. Available for purchase with or without the untouchable disc lock and a 14mm chain.

- › Robust 10mm lasercut steel hook
- › Fits chains with 50-100mm internal aperture length
- › 2 x M10 x 70mm countersunk security screws with shield anchors, steel ball inserts included

PJB561- Hook Wall Anchor, with 14x2000mm chain and Untouchable Lock

Fix into the masonry with the expandable security bolts, then secure by hammering ball bearing into the Allen slot to stop removal.

Shown with the SAS heavy-duty 14x2000mm chain and Monster lock - see page 56

TAURUS BULL RING BOLT DOWN ANCHOR

8622000

The Taurus Bull Ring is a heavy-duty bolt-down ground anchor, which is approved to Sold Secure Gold standard for maximum peace of mind.

- › 150mm square base plate
- › 100mm x 80mm opening accommodates a wide range of chains
- › 22mm heavy duty hardened shackle
- › Tough weather resistant black powder coat finish
- › Suitable for ground or wall mounting
- › 4 x security fixing anchor bolts, steel ball inserts and Allen key included

TAURUS BULL RING CONCRETE IN ANCHOR

8626000

The Taurus Bullring is a heavy-duty built-in ground anchor which is approved to Sold Secure Gold standard for maximum peace of mind.

- › 250mm post length is set into concrete for a permanent and secure hold
- › 100mm x 80mm opening accommodates a wide range of chains
- › 22mm heavy duty hardened shackle
- › Tough weather resistant black powder coat finish

GROUND ANCHORS

ROTAFORCE

8631000

This rotating ground anchor has a durable rotating steel head for flexible locking angles, without losing strength.

- › 26mm case-hardened steel head resists cutting
- › 59mm opening fits various chains
- › 4 x high-security bolts with bolt covers included

TERRAFORCE

8655000

This concrete in ground anchor provides unbeatable strength and secure fixing. Made from case-hardened steel, it resists cutting and pulling.

- › 21mm thick ring resists cutting and levering
- › 59mm internal diameter fits chains up to 16mm
- › Two cross-brace pins prevent upward removal

BRUTEFORCE

8681000

This mini anchor offers strong security for scooters and bicycles.

- › 5mm hardened steel for extra strength
- › 120mm x 88mm back plate
- › 70mm tapering to 50mm x 40mm high bridge
- › Black powder-coated finish protects against corrosion
- › 2 x security fixings, steel ball inserts, and an Allen key included

LOCK IT BIKE ANCHOR

8662000

This simple but effective anchor is compact but offers excellent security.

- › Fits chains, cables or U locks up to 13mm
- › Tough red weather resistance powder coating
- › 2 x M10 x 70mm countersunk security fixing anchor bolts, steel balls and Allen key included
- › Suitable for ground or wall mounting

BIKE-BRUTE ANCHOR

8692000

This compact anchor offers a welded and folded anchor with a strong back plate for extra durability.

- › Fits chains, cables or U locks up to 10mm
- › Solid Zinc plated finish for extreme weather resistance
- › Suitable for ground or wall mounting
- › 2 x M10 x 70mm countersunk security fixing anchor bolts, steel balls and Allen key included.

DOUBLE BRIDGE ANCHOR

8642500

This double bridge fixed bolt down anchor is compact but offers heavy-duty security.

- › Inner 5mm & outer 8mm thick solid steel bridges
- › 37mm aperture enables use with chains up to 14mm
- › Tough red weather resistant powder coating
- › 4 x security fixing anchor bolts, steel ball inserts and Allen key included

BULL POINT ANCHOR

8642000

This single bridge fixed bolt down anchor is heavy duty and compact.

- › 8mm thick solid steel bridge for increased security
- › 48mm aperture enables use with chains up to 14mm
- › Tough red weather resistant powder coating
- › 4 x security fixing anchor bolts, steel ball inserts and Allen key included

GROUND ANCHORS

The SAS Secure Anchor range offers a simple but effective way to secure your equipment, when used with a security chain or cable coupled with a padlock. Simply bolt to a wall or concrete drive for an effective anchor point.

SECURE ANCHOR

8675000

- › Double wall thickness secure anchor for the more demanding applications
- › Can be fitted to concrete floors, driveways or concrete/brick walls
- › Easy to fit with fitting instructions included
- › Fixing kit supplied; 2 x high security expansion bolts, 2 x steel plugs and 2 x anti-tamper ball-bearings
- › The strength of the installation is dependent on the quality of the floor/wall material
- › Great for use with the SAS Heavy-Duty Square Shackle Chains – see page 56

SECURE ANCHOR MINI

8685000

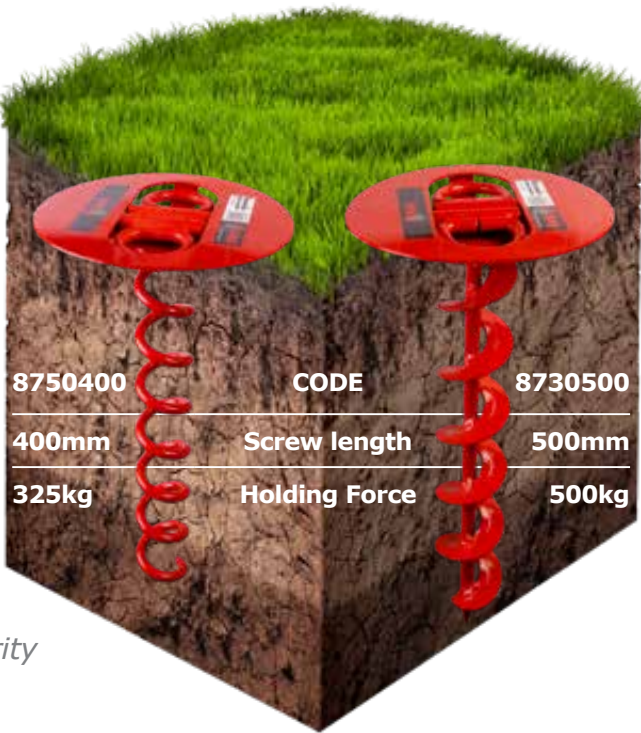

- › Robust secure anchor
- › Can be fitted to concrete floors, driveways or concrete/brick walls
- › Easy to fit - Fitting instructions included
- › Fixing kit supplied; 2 x high security expansion bolts, 2 x steel plugs and 2 x anti-tamper ball-bearings
- › The strength of the installation is dependent on the quality of the floor/wall material
- › Great for use with the SAS Multi-Purpose Chains - see page 57 or with the security steel braided cables - see page 55

SCREWIN GROUND ANCHOR

A heavy-duty ground anchor, simply screw into the ground and gain a great anchoring point to lock your trailer, caravan, motor bike, quad bike, aircraft and more, using a padlock with chain or cable. When finished, unscrew and remove to use another day in another place.

- › Heavy-duty permanent or semi-permanent security anchor to secure any portable valuable item
- › Portable for extra adaptability
- › Extremely strong and easy to use
- › Screw in and out again to move on to a new location
- › 50mm hardened double shackle loops for easy connection
- › Red powder coated paint finish
- › Supplied with winding in bar

CARE PRODUCTS

GENERAL PURPOSE GREASE

A tough waterproof grease that outperforms lithium and synthetic alternatives, delivering lasting lubrication and corrosion protection. Stays put in wet, dirty, or high-load conditions to keep components moving smoothly.

- › Waterproof & wash-out resistant
- › Multi-grease compatible
- › Thermally stable

Great For:

- › Wheel clamps
- › Exposed moving parts

GENERAL PROTECTANT SPRAY

A versatile, long-lasting protectant that forms a strong, water-repellent coating to block moisture and prevent corrosion. Ideal for safeguarding components during storage or winter conditions, it helps maintain the performance and condition of metal and rubber parts.

- › Repels moisture effectively
- › Shields against dirt and grime
- › Durable coating for lasting protection

Great For:

- › Lubricating and protecting locks
- › Long-term and overwinter storage of components

THREAD LOCK

A reliable medium strength thread lock designed to secure bolts and fasteners against vibration and loosening. Provides strong hold while still allowing disassembly when needed.

- › Prevents loosening from vibration
- › Protects threads from wear and corrosion
- › Removable with standard tools

Great For:

- › Securing bolts and fasteners
- › Applications requiring future disassembly

THE SAS GREEN RANGE

We believe in offering security solutions that truly fit your requirements. Our green range is a highly visible, affordable alternative to our premium red range. It offers reliable entry-level wheel clamps and hitchlocks designed to fit the most common trailers, caravans, and vehicles.*

76 - 81

- 76 HITCH EYE LOCKS
- 77-79 HITCH LOCKS
- 80-81 WHEELCLAMPS

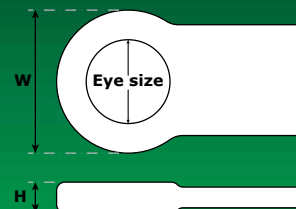

** For the highest level of security, we would still recommend our well-respected SAS heavy-duty red products, which are designed for maximum protection.*

SAS GREEN iLOCK

The SAS GREEN iLOCK is a versatile eye lock designed to fit a wide range of trailers using an eye type coupling.

A simple design using a main shaft fitted with a robust round padlock with enclosed shackle making it difficult to attack.

Product Code	Model	Fits unhitched	Fits hitched	Fits	Eye Dimensions	
					Eye Size	h
V283771	GREEN iLOCK Eye lock	✓	✗	Most 40 & 50mm eye couplings	40-60mm	Up to 35mm

SAS HD71 Round Padlock included - Replacement code 8300071 on page 60

SAS GREEN RANGE HITCHLOCKS

SAS GREEN AKS HITCHLOCK

The SAS GREEN AKS hitchlock is a robust yet lightweight security solution designed to protect your caravan or trailer. It's simple to install and is supplied with the SAS HD71 round steel padlock, complete with two keys for convenience.

This strong combination effectively immobilises your hitch, helping to deter tow-away theft and may even lower your insurance costs.

The bright green powder-coated finish not only looks great but also acts as a visual deterrent to potential thieves.

- › Strong steel box construction encloses coupling
- › Fully enclosed top section covers fitting bolts and hitch release handle
- › Box structure protecting hitch from weathering
- › Fits when Unhitched and Hitched (whilst Stationary)
- › Designed to Fit Al-Ko AKS 2004 & AKS 3004 Stabiliser Couplings fitted on most caravans
- › Will also fit some other Al-Ko hitch couplings, such as AK160, AK180, AK300 & AKS1300
- › Can be quickly and easily fitted, with hardened steel round padlock, supplied with 2 keys
- › Bright green powder coating enhances visibility, acting as a strong theft deterrent
- › ABS towball supplied to increase security whilst unhitched
