## Maintenance

On a regular basis for optimum performance:

- Clean and lubricate moving parts.  
We recommend using SAS Mint General Protectant Spray to lubricate and protect the locks of all our products.

## Spare Parts

Replacement Parts can be ordered at your local SAS dealer, or online at [www.sasproducts.com](http://www.sasproducts.com)

## To assemble

- 1 Initial setup - remove the bolt on the locking handle(s) you wish to fit to.

Replace with bolt and special spacer - you may require some thread lock to keep it from coming loose.

- 2 Unlock the box lock using the keys supplied. Lock will 'pop-out', then the keys can be removed and the inner housing (silver) can be removed from inside the red housing.

- 3 Make sure the trailer handle is fully closed then slide the inner and out housing together over the handle making sure they locate over the special spacer you have fitted (step 1).

- 4 Once the two housings are fully pushed together, the lock button can be pressed right in. Make sure the housing has located firmly and the box is holding secure.

- 5 To remove - use the keys in the lock to allow lock button to 'pop-out', then slide the two housings apart.

**IT IS IMPERATIVE THAT THE LOCK IS FITTED CORRECTLY FOR EFFECTIVE PROTECTION.**

## About SAS

We understand the life of towing and what is important to you. A caravan or a motorhome is more than a box on wheels – it is a home, a store of happy memories and a lifestyle. A trailer is more than just a transport device – it is still the most flexible means available to transport bulky items from A to B by yourself. We know the importance of the experiences you build in your caravan or the days you spend with your trailer behind you.

Unfortunately however, in today's world, crime and theft continue to increase. Over 4000 caravans are stolen in the UK each year\*, and less than 3% are ever fully recovered\*\*.

Our vision is to bring a stop to caravan and trailer theft with quality, reliable security solutions that deter criminals and prevent crime. We are on a mission to preserve your assets and memories and give you peace of mind.

**Nothing speak of quality, reliability and peace of mind quite like a SAS CLAMP.**

In over 30 years of speaking to owners of trailers and caravans, we have developed our solutions to fit your needs, and we are proud of the confidence placed in us by owners, insurers, quality controllers and our distribution network alike.

**Visit the SAS website today to find other ways to SECURE YOUR WORLD.**
