

# ***FORT Hitchlock Instructions***

## FORT Models

**FORT A**

**FORT AK**

**FORT B**

**FORT K**

**FORT T**

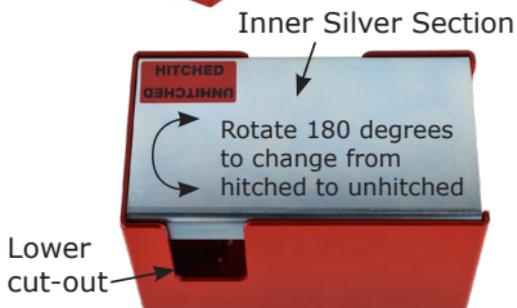

**FORT TU**

**FORT U**

## Components

*Specific models may vary slightly from model shown*

## Maintenance

On a regular basis for optimum performance:

- Clean and lubricate moving parts. We recommend using SAS Mint General Protectant Spray to lubricate the locks of all our products.

## Spare Parts

Replacement Parts can be ordered at your local SAS dealer, or online at [www.sasproducts.com](http://www.sasproducts.com)

## SAS FORT Hitchlock Instructions

The FORT Hitchlock is available in several models designed to fit different types of trailer hitches. These instructions apply to the FORT range (excluding the FORT 2, 30 & 35 GOLD).

The hitchlock consists of two main parts – red outer section, and the silver inner section.

### Separating the Two Sections or Removing from a Trailer Coupling:-

1. Insert the cross key into the lock on the coloured outer section. Ensure the flat side of the key faces the front of the hitchlock.
2. Turn the key 180° to unlock.
3. Slide the inner silver section out of the outer section.

### Fitting the FORT Hitchlock to a Coupling Hitch:-

1. Slide the red outer section over the trailer's coupling hitch.
  - If the trailer is already coupled to a towball, the lower cut-out allows the hitchlock to fit around it.
2. Slide the silver inner section into the red outer housing.
  - Check that the red label is the correct way up, depending on whether the trailer is hitched or unhitched.
  - The label shows "HITCHED" and "UNHITCHED" — one will read normally while the other will appear upside down.

*Note:* If you have a FORT TU or FORT U model, the inner silver section will only fit one way, but it can still be used whether the trailer is hitched or unhitched.

### IMPORTANT

1. Never move or drive a vehicle with the hitchlock fitted.
2. The hitchlock must be fitted correctly to ensure effective protection.

# About SAS

For over 38 years, SAS has been dedicated to designing and manufacturing reliable security solutions to protect your most valuable assets. Our robust products are rigorously tested and we are proud to say are trusted by owners, insurers, and industry experts alike. We offer a full range of security solutions, including **wheel clamps, hitch locks, garage locks, and other universal security products.**

**Visit the SAS website to explore our full range of security products and SECURE YOUR WORLD TODAY!**

## Hitch Locks

Lock Hitched - Easily secure your trailer or towed equipment to your vehicle when stationary.

Lock Unhitched - Quickly secure your trailer or equipment when parked and uncoupled from your vehicle.

## Wheel Clamps

Stop unauthorised movement  
— secure the wheel of your vehicle or equipment for added protection.

## Security Posts

Heavy-duty removable security posts. Enhance protection with an optional tow ball bracket to secure your vehicle or trailer to the post.

## Chains & Padlocks

Wide range of heavy-duty chains and padlocks to keep your vehicle or equipment secure.

## Ground Anchors

Easily create a secure anchor point to attach chains and deter theft.
